Neuroepidemiology (Handbook of Clinical Neurology)

Neuroepidemiology (Handbook of Clinical Neurology)

Neuroepidemiology covers the foundations of neuroepidemiological research and the epidemiology of disorders primarily affecting the nervous system, as well as those originating outside the nervous system. The etiology of many important central nervous system disorders remains elusive. Even with diseases where the key risk determinants have been identified, better prevention and therapy is needed to reduce high incidence and mortality. Although evolving technologies for studying disease provide opportunities for such, it is essential for researchers and clinicians to understand how best to apply such technology in the context of carefully characterized patient populations.

By paying special attention to methodological approaches, this volume prepares new investigators from a variety of disciplines to conduct epidemiological studies in order to discern the etiologic factors and underlying mechanisms that influence the onset, progression, and recurrence of CNS disorders and diseases. The book also provides current information on methodological approaches for clinical neurologists seeking to expand their knowledge in research.

- Includes coverage of the foundations of neuroepidemiological research and the epidemiology of disorders primarily affecting the nervous system, as well as those originating outside the nervous system
- Describes the most recent methodologies to define and quantify the burden of CNS disorders and to understand the underlying mechanisms, with neuroimaging and molecular methods receiving particular emphasis
- Offers extensive description of those neurological conditions that are secondary to other diseases whose incidence is on the rise because of longer survival rates
- Features chapters authored by leaders in the field from around the globe

From reader reviews:

Nancy Lowery:

Do you have favorite book? Should you have, what is your favorite's book? Publication is very important thing for us to understand everything in the world. Each guide has different aim as well as goal; it means that publication has different type. Some people experience enjoy to spend their a chance to read a book. They are reading whatever they take because their hobby is definitely reading a book. Think about the person who don't like looking at a book? Sometime, man feel need book once they found difficult problem or perhaps exercise. Well, probably you will require this Neuroepidemiology (Handbook of Clinical Neurology).

Cecil Atkins:

You are able to spend your free time you just read this book this e-book. This Neuroepidemiology (Handbook of Clinical Neurology) is simple to deliver you can read it in the park your car, in the beach, train as well as soon. If you did not possess much space to bring the particular printed book, you can buy typically the e-book. It is make you easier to read it. You can save the book in your smart phone. And so there are a lot of benefits that you will get when one buys this book.

Beatrice Kennemer:

Beside this particular Neuroepidemiology (Handbook of Clinical Neurology) in your phone, it may give you a way to get nearer to the new knowledge or info. The information and the knowledge you will got here is fresh from the oven so don't be worry if you feel like an previous people live in narrow village. It is good thing to have Neuroepidemiology (Handbook of Clinical Neurology) because this book offers to your account readable information. Do you occasionally have book but you don't get what it's facts concerning. Oh come on, that would not happen if you have this within your hand. The Enjoyable agreement here cannot be questionable, just like treasuring beautiful island. So do you still want to miss this? Find this book and also read it from currently!

Debra McGregor:

This Neuroepidemiology (Handbook of Clinical Neurology) is completely new way for you who has attention to look for some information given it relief your hunger info. Getting deeper you into it getting knowledge more you know otherwise you who still having little bit of digest in reading this Neuroepidemiology (Handbook of Clinical Neurology) can be the light food for yourself because the information inside this kind of book is easy to get by anyone. These books develop itself in the form which is reachable by anyone, yes I mean in the e-book type. People who think that in guide form make them feel sleepy even dizzy this reserve is the answer. So you cannot find any in reading a publication especially this one. You can find what you are looking for. It should be here for anyone. So , don't miss it! Just read this e-book variety for your better life along with knowledge.
