Rankings and Preferences: New Results in Weighted Correlation and Weighted Principal Component Analysis with Applications (SpringerBriefs in Statistics) Joaquim Pinto da Costa

This book examines in detail the correlation, more precisely the weighted correlation and applications involving rankings. A general application is the evaluation of methods to predict rankings. Others involve rankings representing human preferences to infer user preferences; the use of weighted correlation with microarray data and those in the domain of time series. In this book we present new weighted correlation coefficients and new methods of weighted principal component analysis.

We also introduce new methods of dimension reduction and clustering for time series data and describe some theoretical results on the weighted correlation coefficients in separate sections.

From reader reviews:

Tamika Sheppard:

This Rankings and Preferences: New Results in Weighted Correlation and Weighted Principal Component Analysis with Applications (SpringerBriefs in Statistics) usually are reliable for you who want to become a successful person, why. The explanation of this Rankings and Preferences: New Results in Weighted Correlation and Weighted Principal Component Analysis with Applications (SpringerBriefs in Statistics) can be one of many great books you must have is actually giving you more than just simple examining food but feed an individual with information that maybe will shock your earlier knowledge. This book is definitely handy, you can bring it everywhere and whenever your conditions at e-book and printed types. Beside that this Rankings and Preferences: New Results in Weighted Correlation and Weighted Principal Component Analysis with Applications (SpringerBriefs in Statistics) giving you an enormous of experience including rich vocabulary, giving you demo of critical thinking that we know it useful in your day pastime. So , let's have it and luxuriate in reading.

Eileen Matherly:

Often the book Rankings and Preferences: New Results in Weighted Correlation and Weighted Principal Component Analysis with Applications (SpringerBriefs in Statistics) has a lot details on it. So when you read this book you can get a lot of advantage. The book was authored by the very famous author. The author makes some research previous to write this book. This particular book very easy to read you can find the point easily after looking over this book.

Bernadine Parker:

Your reading sixth sense will not betray a person, why because this Rankings and Preferences: New Results in Weighted Correlation and Weighted Principal Component Analysis with Applications (SpringerBriefs in Statistics) book written by well-known writer who knows well how to make book that may be understand by anyone who all read the book. Written throughout good manner for you, still dripping wet every ideas and composing skill only for eliminate your own personal hunger then you still skepticism Rankings and Preferences: New Results in Weighted Correlation and Weighted Principal Component Analysis with Applications (SpringerBriefs in Statistics) as good book not merely by the cover but also through the content. This is one publication that can break don't determine book by its handle, so do you still needing one more sixth sense to pick this particular!?! Oh come on your looking at sixth sense already said so why you have to listening to another sixth sense.

James Ojeda:

Do you like reading a e-book? Confuse to looking for your selected book? Or your book was rare? Why so many query for the book? But virtually any people feel that they enjoy with regard to reading. Some people

likes looking at, not only science book but novel and Rankings and Preferences: New Results in Weighted Correlation and Weighted Principal Component Analysis with Applications (SpringerBriefs in Statistics) or perhaps others sources were given know-how for you. After you know how the good a book, you feel would like to read more and more. Science guide was created for teacher or perhaps students especially. Those textbooks are helping them to increase their knowledge. In some other case, beside science publication, any other book likes Rankings and Preferences: New Results in Weighted Correlation and Weighted Principal Component Analysis with Applications (SpringerBriefs in Statistics) to make your spare time a lot more colorful. Many types of book like this.
