Machine Learning Models and Algorithms for Big Data Classification: Thinking with Examples for Effective Learning (Integrated Series in Information Systems) Shan Suthaharan

This book presents machine learning models and algorithms to address big data classification problems. Existing machine learning techniques like the decision tree (a hierarchical approach), random forest (an ensemble hierarchical approach), and deep learning (a layered approach) are highly suitable for the system that can handle such problems. This book helps readers, especially students and newcomers to the field of big data and machine learning, to gain a quick understanding of the techniques and technologies; therefore, the theory, examples, and programs (Matlab and R) presented in this book have been simplified, hardcoded, repeated, or spaced for improvements. They provide vehicles to test and understand the complicated concepts of various topics in the field. It is expected that the readers adopt these programs to experiment with the examples, and then modify or write their own programs toward advancing their knowledge for solving more complex and challenging problems.

The presentation format of this book focuses on simplicity, readability, and dependability so that both undergraduate and graduate students as well as new researchers, developers, and practitioners in this field can easily trust and grasp the concepts, and learn them effectively. It has been written to reduce the mathematical complexity and help the vast majority of readers to understand the topics and get interested in the field. This book consists of four parts, with the total of 14 chapters. The first part mainly focuses on the topics that are needed to help analyze and understand data and big data. The second part covers the topics that can explain the systems required for processing big data. The third part presents the topics required to understand and select machine learning techniques to classify big data. Finally, the fourth part concentrates on the topics that explain the scaling-up machine learning, an important solution for modern big data problems.

From reader reviews:

Harley Fabry:

Machine Learning Models and Algorithms for Big Data Classification: Thinking with Examples for Effective Learning (Integrated Series in Information Systems) can be one of your beginning books that are good idea. Many of us recommend that straight away because this guide has good vocabulary that will increase your knowledge in terminology, easy to understand, bit entertaining however delivering the information. The article author giving his/her effort to put every word into delight arrangement in writing Machine Learning Models and Algorithms for Big Data Classification: Thinking with Examples for Effective Learning (Integrated Series in Information Systems) however doesn't forget the main place, giving the reader the hottest and based confirm resource facts that maybe you can be one of it. This great information can drawn you into brand new stage of crucial thinking.

Natalia Burton:

Reading a book to become new life style in this season; every people loves to read a book. When you learn a book you can get a wide range of benefit. When you read textbooks, you can improve your knowledge, because book has a lot of information on it. The information that you will get depend on what forms of book that you have read. If you would like get information about your research, you can read education books, but if you act like you want to entertain yourself you can read a fiction books, such us novel, comics, in addition to soon. The Machine Learning Models and Algorithms for Big Data Classification: Thinking with Examples for Effective Learning (Integrated Series in Information Systems) provide you with a new experience in studying a book.

Jacqueline Kellett:

As a pupil exactly feel bored for you to reading. If their teacher asked them to go to the library or make summary for some guide, they are complained. Just small students that has reading's internal or real their leisure activity. They just do what the teacher want, like asked to the library. They go to generally there but nothing reading significantly. Any students feel that reading through is not important, boring in addition to can't see colorful photographs on there. Yeah, it is to become complicated. Book is very important for you. As we know that on this age, many ways to get whatever you want. Likewise word says, many ways to reach Chinese's country. Therefore , this Machine Learning Models and Algorithms for Big Data Classification: Thinking with Examples for Effective Learning (Integrated Series in Information Systems) can make you truly feel more interested to read.

Glenn Connelly:

What is your hobby? Have you heard this question when you got college students? We believe that that query was given by teacher on their students. Many kinds of hobby, Every individual has different hobby.

Therefore you know that little person like reading or as looking at become their hobby. You need to know that reading is very important in addition to book as to be the thing. Book is important thing to provide you knowledge, except your personal teacher or lecturer. You will find good news or update in relation to something by book. A substantial number of sorts of books that can you take to be your object. One of them are these claims Machine Learning Models and Algorithms for Big Data Classification: Thinking with Examples for Effective Learning (Integrated Series in Information Systems).

Download and Read Online Machine Learning Models and Algorithms for Big Data Classification: Thinking with Examples for Effective Learning (Integrated Series in Information Systems) Shan Suthaharan #68W73LUS942

Read Machine Learning Models and Algorithms for Big Data Classification: Thinking with Examples for Effective Learning (Integrated Series in Information Systems) by Shan Suthaharan for online ebook

Machine Learning Models and Algorithms for Big Data Classification: Thinking with Examples for Effective Learning (Integrated Series in Information Systems) by Shan Suthaharan Free PDF d0wnl0ad, audio books, books to read, good books to read, cheap books, good books, online books, books online, book reviews epub, read books online, books to read online, online library, greatbooks to read, PDF best books to read, top books to read Machine Learning Models and Algorithms for Big Data Classification: Thinking with Examples for Effective Learning (Integrated Series in Information Systems) by Shan Suthaharan books to read online.
