Modeling and Verification of Parallel Processes: 4th Summer School, MOVEP 2000, Nantes, France, June 19-23, 2000. Revised Tutorial Lectures (Lecture Notes in Computer Science)

Daily life relies more and more on safety critical systems, e.g. in areas such as power plant control, traffic management, flight control, and many more. MOVEP is a school devoted to the broad subject of modeling and verifying software and hardware systems.

This volume contains tutorials and annotated bibliographies covering the main subjects addressed at MOVEP 2000. The four tutorials deal with Model Checking, Theorem Proving, Composition and Abstraction Techniques, and Timed Systems. Three research papers give detailed views of High-Level Message Sequence Charts, Industrial Applications of Model Checking, and the use of Formal Methods in Security. Finally, four annotated bibliographies give an overview of Infinite State Space Systems, Testing Transition Systems, Fault-Model-Driven Test Derivation, and Mobile Processes.

From reader reviews:

Frances Norman:

Do you have favorite book? When you have, what is your favorite's book? Guide is very important thing for us to know everything in the world. Each publication has different aim as well as goal; it means that book has different type. Some people feel enjoy to spend their time to read a book. They can be reading whatever they acquire because their hobby will be reading a book. What about the person who don't like examining a book? Sometime, particular person feel need book once they found difficult problem or exercise. Well, probably you'll have this Modeling and Verification of Parallel Processes: 4th Summer School, MOVEP 2000, Nantes, France, June 19-23, 2000. Revised Tutorial Lectures (Lecture Notes in Computer Science).

Tony Edwin:

What do you ponder on book? It is just for students as they are still students or the item for all people in the world, exactly what the best subject for that? Merely you can be answered for that query above. Every person has diverse personality and hobby for every other. Don't to be compelled someone or something that they don't need do that. You must know how great along with important the book Modeling and Verification of Parallel Processes: 4th Summer School, MOVEP 2000, Nantes, France, June 19-23, 2000. Revised Tutorial Lectures (Lecture Notes in Computer Science). All type of book would you see on many resources. You can look for the internet resources or other social media.

Joan Burton:

As we know that book is essential thing to add our expertise for everything. By a reserve we can know everything we really wish for. A book is a pair of written, printed, illustrated as well as blank sheet. Every year was exactly added. This guide Modeling and Verification of Parallel Processes: 4th Summer School, MOVEP 2000, Nantes, France, June 19-23, 2000. Revised Tutorial Lectures (Lecture Notes in Computer Science) was filled concerning science. Spend your extra time to add your knowledge about your research competence. Some people has diverse feel when they reading the book. If you know how big benefit from a book, you can experience enjoy to read a publication. In the modern era like today, many ways to get book that you simply wanted.

Henry Heath:

Reading a guide make you to get more knowledge from the jawhorse. You can take knowledge and information originating from a book. Book is composed or printed or created from each source that filled update of news. In this modern era like today, many ways to get information are available for you actually. From media social just like newspaper, magazines, science reserve, encyclopedia, reference book, book and comic. You can add your knowledge by that book. Ready to spend your spare time to open your book? Or just looking for the Modeling and Verification of Parallel Processes: 4th Summer School, MOVEP 2000,

Nantes, France, June 19-23, 2000. Revised Tutorial Lectures (Lecture Notes in Computer Science) when you necessary it?
