## Measuring Selection in Natural Populations (Lecture Notes in Biomathematics)

The present volume constitutes the proceedings of the symposium: "Measuring Selection in Natural Populations," held in memory of late professor Ove Frydenberg. The Symposium took place in Sandbjerg Manor House in Southern Jutland May 10-14, 1976. The purpose of the symposium was to reflect contemporary research on the mechanisms of biological evolution. The arrangement of the symposium was possible only with the assistance and work of many other people. Professor Ole Barndorff-Nielsen took an active part in the planning and arrangement of the symposium. Our gratitude is also due to Ellen Christensen, Jens Ole Frier, Arno Jensen, Preben Jensen and Anne Nissen, all of whom took care of the practical arrangements at the symposium. The publication was prepared with the assistance of Arno Jensen, Preben Jensen, Verner Blak Nielsen and Kirsten Svendsen. The Symposium was financed by grants from The Danish Natural Science Research Council, The Danish Atomic Energy Commission and The University of Aarhus. Aarhus, June 1977 Freddy B. Christiansen Tom M. Fenchel LIST OF PARTICIPANTS AND CONTRIBUTORS ALLARD, R.W.: Department of Genetics, University of California, Davis, California 95616, USA. ANDERSEN, A. HOLST: Department of Theoretical Statistics, Institute of Mathematics, University of Aarhus, Ny Munkegade, DK-8000 Aarhus C, Denmark.
