Mobile Applications Development with Android: Technologies and Algorithms Meikang Qiu, Wenyun Dai, Keke Gai

Mobile Applications Development with Android: Technologies and Algorithms presents advanced techniques for mobile app development, and addresses recent developments in mobile technologies and wireless networks. The book covers advanced algorithms, embedded systems, novel mobile app architecture, and mobile cloud computing paradigms.

Divided into three sections, the book explores three major dimensions in the current mobile app development domain. The first section describes mobile app design and development skills, including a quick start on using Java to run an Android application on a real phone. It also introduces 2D graphics and UI design, as well as multimedia in Android mobile apps.

The second part of the book delves into advanced mobile app optimization, including an overview of mobile embedded systems and architecture. Data storage in Android, mobile optimization by dynamic programming, and mobile optimization by loop scheduling are also covered. The last section of the book looks at emerging technologies, including mobile cloud computing, advanced techniques using Big Data, and mobile Big Data storage.

About the Authors

Meikang Qiu is an Associate Professor of Computer Science at Pace University, and an adjunct professor at Columbia University. He is an IEEE/ACM Senior Member, as well as Chair of the IEEE STC (Special Technical Community) on Smart Computing. He is an Associate Editor of a dozen of journals including *IEEE Transactions on Computers* and *IEEE Transactions on Cloud Computing*. He has published 320+ peer-reviewed journal/conference papers and won 10+ Best Paper Awards.

Wenyun Dai is pursuing his PhD at Pace University. His research interests include high performance computing, mobile data privacy, resource management optimization, cloud computing, and mobile networking. His paper about mobile app privacy has been published in *IEEE Transactions on Computers.*

Keke Gai is pursuing his PhD at Pace University. He has published over 60 peer-reviewed journal or conference papers, and has received three IEEE Best Paper Awards. His research interests include cloud computing, cyber security, combinatorial optimization, business process modeling, enterprise architecture, and Internet computing.

From reader reviews:

Charles Settles:

Spent a free time and energy to be fun activity to try and do! A lot of people spent their spare time with their family, or their own friends. Usually they carrying out activity like watching television, gonna beach, or picnic inside park. They actually doing same task every week. Do you feel it? Do you want to something different to fill your current free time/ holiday? Can be reading a book can be option to fill your free time/ holiday. The first thing that you will ask may be what kinds of book that you should read. If you want to try out look for book, may be the book untitled Mobile Applications Development with Android: Technologies and Algorithms can be fine book to read. May be it is usually best activity to you.

Robin Curtin:

Often the book Mobile Applications Development with Android: Technologies and Algorithms has a lot details on it. So when you read this book you can get a lot of advantage. The book was compiled by the very famous author. The author makes some research ahead of write this book. This book very easy to read you will get the point easily after reading this article book.

Hazel Reinoso:

As a college student exactly feel bored to help reading. If their teacher asked them to go to the library or to make summary for some publication, they are complained. Just minor students that has reading's heart and soul or real their interest. They just do what the trainer want, like asked to the library. They go to at this time there but nothing reading seriously. Any students feel that looking at is not important, boring in addition to can't see colorful images on there. Yeah, it is for being complicated. Book is very important for you. As we know that on this era, many ways to get whatever we wish. Likewise word says, ways to reach Chinese's country. Therefore this Mobile Applications Development with Android: Technologies and Algorithms can make you really feel more interested to read.

Lisa Lee:

A lot of people said that they feel bored stiff when they reading a reserve. They are directly felt the idea when they get a half elements of the book. You can choose the actual book Mobile Applications Development with Android: Technologies and Algorithms to make your personal reading is interesting. Your own personal skill of reading proficiency is developing when you such as reading. Try to choose simple book to make you enjoy to learn it and mingle the opinion about book and reading especially. It is to be first opinion for you to like to open up a book and go through it. Beside that the e-book Mobile Applications Development with Android: Technologies and Algorithms can to be your brand-new friend when you're truly feel alone and confuse using what must you're doing of their time.
