Competition Car Composites: A Practical Guide (Haynes competition car series) Simon McBeath

The use of 'composites' is now an essential element in the construction of competition cars, so it is important that those involved in the sport have a thorough understanding of what they are, and how they can be employed. This practical guide covers all aspects of composite fiber reinforced plastic manufacturing techniques: wet and dry laminating techniques; pattern making and constructing moulds; material upgrades; vacuum consolidation and elevated temperature cure; pre-peg fabrics in the home workshop, and more. A valuable source of reference.
