Advanced Structured Prediction (Neural Information Processing series)

Advanced Structured Prediction (Neural Information Processing series)

Advanced Structured Prediction (Neural Information Processing series)

The goal of structured prediction is to build machine learning models that predict relational information that itself has structure, such as being composed of multiple interrelated parts. These models, which reflect prior knowledge, task-specific relations, and constraints, are used in fields including computer vision, speech recognition, natural language processing, and computational biology. They can carry out such tasks as predicting a natural language sentence, or segmenting an image into meaningful components.

These models are expressive and powerful, but exact computation is often intractable. A broad research effort in recent years has aimed at designing structured prediction models and approximate inference and learning procedures that are computationally efficient. This volume offers an overview of this recent research in order to make the work accessible to a broader research community. The chapters, by leading researchers in the field, cover a range of topics, including research trends, the linear programming relaxation approach, innovations in probabilistic modeling, recent theoretical progress, and resource-aware learning.

Sebastian Nowozin is a Researcher in the Machine Learning and Perception group (MLP) at Microsoft Research, Cambridge, England. Peter V. Gehler is a Senior Researcher in the Perceiving Systems group at the Max Planck Institute for Intelligent Systems, Tübingen, Germany. Jeremy Jancsary is a Senior Research Scientist at Nuance Communications, Vienna. Christoph H. Lampert is Assistant Professor at the Institute of Science and Technology Austria, where he heads a group for Computer Vision and Machine Learning.

Contributors Jonas Behr, Yutian Chen, Fernando De La Torre, Justin Domke, Peter V. Gehler, Andrew E. Gelfand, Sébastien Giguère, Amir Globerson, Fred A. Hamprecht, Minh Hoai, Tommi Jaakkola, Jeremy Jancsary, Joseph Keshet, Marius Kloft, Vladimir Kolmogorov, Christoph H. Lampert, François Laviolette, Xinghua Lou, Mario Marchand, André F. T. Martins, Ofer Meshi, Sebastian Nowozin, George Papandreou, Daniel Pr?ša, Gunnar Rätsch, Amélie Rolland, Bogdan Savchynskyy, Stefan Schmidt, Thomas Schoenemann, Gabriele Schweikert, Ben Taskar, Sinisa Todorovic, Max Welling, David Weiss, Thomáš Werner, Alan Yuille, Stanislav Živný

Download and Read Free Online Advanced Structured Prediction (Neural Information Processing series)

From reader reviews:

Sarah Fernandez:

Book is usually written, printed, or created for everything. You can learn everything you want by a e-book. Book has a different type. As we know that book is important matter to bring us around the world. Close to that you can your reading expertise was fluently. A reserve Advanced Structured Prediction (Neural Information Processing series) will make you to always be smarter. You can feel much more confidence if you can know about every thing. But some of you think that will open or reading any book make you bored. It is not make you fun. Why they may be thought like that? Have you looking for best book or suitable book with you?

Adelina Thompson:

This Advanced Structured Prediction (Neural Information Processing series) usually are reliable for you who want to certainly be a successful person, why. The main reason of this Advanced Structured Prediction (Neural Information Processing series) can be one of several great books you must have is usually giving you more than just simple reading food but feed you with information that maybe will shock your preceding knowledge. This book is definitely handy, you can bring it just about everywhere and whenever your conditions in the e-book and printed versions. Beside that this Advanced Structured Prediction (Neural Information Processing series) forcing you to have an enormous of experience for instance rich vocabulary, giving you test of critical thinking that we realize it useful in your day task. So , let's have it appreciate reading.

Ann McLemore:

The publication with title Advanced Structured Prediction (Neural Information Processing series) includes a lot of information that you can discover it. You can get a lot of gain after read this book. This specific book exist new know-how the information that exist in this guide represented the condition of the world now. That is important to yo7u to find out how the improvement of the world. This particular book will bring you inside new era of the glowbal growth. You can read the e-book on the smart phone, so you can read this anywhere you want.

Shirley Pedro:

As we know that book is very important thing to add our expertise for everything. By a publication we can know everything we wish. A book is a group of written, printed, illustrated or maybe blank sheet. Every year ended up being exactly added. This publication Advanced Structured Prediction (Neural Information Processing series) was filled about science. Spend your free time to add your knowledge about your scientific research competence. Some people has several feel when they reading a book. If you know how big selling point of a book, you can really feel enjoy to read a reserve. In the modern era like right now, many ways to get book that you wanted.
