## **Guidelines for the Safe Investigation by Drilling of Landfills and Contaminated Land (Site Investigation in Construction) (Pt. 4) Not Available**

These guidelines seek to promote the use of safe working practices in the investigation of landfills and contaminated land. They are intended for use by individuals or organisations who are involved in the planning, specification, procurement, supervision and execution of such work. For each project the objectives and anticipated hazards should be clearly defined and categorised to enable the site investigation contractor to select the appropriate plant, equipment, drilling methods, materials and protective measures for the safe investigation for the site.
