Agri-Food Crops: Processing, Value Addition, Packaging and Storage R. Sasi Kumar

The book deals with value addition and processing of agro-food crops. Each agro-food crop is discussed from the point of its production, processing, value addition, packaging and storage. Main food crops of special importance in the food processing sector like cereals, millets and pulses, minor forest products, fruits and vegetables and milk and milk based products are considered at length. The book gives a comprehensive account of food processing and value addition with regards to encourage for setting up small food processing industries in their local area using local agro food crops base. Indigenous food preparations based on fermented cereals and pulse, milk and other crops based products have been discussed. Various food laws and regulation by the Government to control food quality and standards are highlighted. Agro food based, food processing industry, in small or cottage scale level in their local region with available resource projects are also discussed in details. An outstanding text for students, researchers and entrepreneurs in food processing with little or no previous instruction in food science and technology, food science is also a valuable reference for professionals in food processing, as well as for those working in fields that serves, regulates or otherwise interfaces with the food processing industry.
