Earth Materials

Kevin Hefferan, John O'Brien

Earth Materials Kevin Hefferan, John O'Brien

Minerals and rocks form the foundation of geologic studies. This new textbook has been written to address the needs of students at the increasing number of universities that have compressed separate mineralogy and petrology courses into a one- or two-semester Earth materials course.

Key features of this book include:

- equal coverage of mineralogy, sedimentary petrology, igneous petrology and metamorphic petrology;
- copious field examples and regional relationships with graphics that illustrate the concepts discussed;
- numerous case studies to show the uses of earth materials as resources and their fundamental role in our lives and the global economy, and their relation to natural and human-induced hazards;
- the integration of earth materials into a cohesive process-based earth systems framework;
- two color throughout with 48 pages of four color.

Readership: students taking an earth materials, or combined mineralogy and petrology course in an earth science degree program. It will also be useful for environmental scientists, engineering geologists, and physical geographers who need to learn about minerals, rocks, soil and water in a comprehensive framework.

A companion website for this book is available at: www.wiley.com/go/hefferan/earthmaterials.

From reader reviews:

James Ray:

What do you consider book? It is just for students since they are still students or the item for all people in the world, the actual best subject for that? Merely you can be answered for that question above. Every person has several personality and hobby for every single other. Don't to be pushed someone or something that they don't need do that. You must know how great as well as important the book Earth Materials. All type of book can you see on many sources. You can look for the internet solutions or other social media.

Norma Ochoa:

That publication can make you to feel relax. This particular book Earth Materials was multi-colored and of course has pictures around. As we know that book Earth Materials has many kinds or type. Start from kids until teens. For example Naruto or Investigator Conan you can read and think you are the character on there. Therefore , not at all of book tend to be make you bored, any it offers you feel happy, fun and loosen up. Try to choose the best book in your case and try to like reading that will.

Donna Johnson:

As a scholar exactly feel bored for you to reading. If their teacher questioned them to go to the library or to make summary for some publication, they are complained. Just little students that has reading's soul or real their interest. They just do what the trainer want, like asked to the library. They go to at this time there but nothing reading critically. Any students feel that looking at is not important, boring and can't see colorful images on there. Yeah, it is for being complicated. Book is very important for you. As we know that on this age, many ways to get whatever you want. Likewise word says, ways to reach Chinese's country. Therefore this Earth Materials can make you truly feel more interested to read.

Pearlie Wong:

Many people said that they feel bored when they reading a guide. They are directly felt this when they get a half regions of the book. You can choose the actual book Earth Materials to make your own personal reading is interesting. Your own personal skill of reading skill is developing when you such as reading. Try to choose basic book to make you enjoy to learn it and mingle the opinion about book and reading especially. It is to be very first opinion for you to like to available a book and learn it. Beside that the book Earth Materials can to be your new friend when you're experience alone and confuse in doing what must you're doing of these time.
