How to Build a Lowrider (General) Frank Hamilton

Once confined to South California, the low rider phenomena is now securely entrenched across the U.S. with shows, competitions and specialty builders found from Los Angeles to New York. This first-ever look at this specialized form of car building provides a serious, in depth, "how-to" examination of major elements of low rider constructions with technical information concerning the design and construction of the unique hydraulic systems, specialty metal plating, vehicle lowering, drive train modification, etc. Includes good emphasis on the latest trend in low riders, i.e. the construction of European/Pacific Rim low riders.
