Maternal and Child Health: Global Challenges, Programs, and Policies

Maternal and Child Health: Global Challenges, Programs, and Policies

Our current era of globalization, war, and socioeconomic unrest has revealed public health as a worldwide concern and a major frontier for social justice with maternal and child health at its epicenter. Yet, there has been a relative scarcity of training resources specifically dedicated to this crucial area. "Maternal and Child Health: Global Challenges, Programs, and Policies" addresses this gap in current knowledge by analyzing the range of socioeconomic and environmental factors, health care disparities, politics, policies, and cultural practices that impact the health and safety of mothers, as well as the well-being and optimum development of their children.

Individual sections focus on unequal distribution of the world's resources, politics and power, specific disease concerns, programs, policies and emerging concerns with a focus on what is currently being done, and what needs to be done to improve the health status of women, children, and adolescents. The book's contributors are some of the world's most respected experts, carefully selected to represent different global geographic regions and diverse professional disciplines related to maternal and child health from both academic and field practice perspectives.

Among the topics in this authoritative volume: The impact of war, globalization, gender inequity, and harmful traditional practices (e.g., female genital mutilation). Specific health concerns, including tuberculosis, malaria, HIV, and malnutrition. Child and adolescent health issues, from abuse and neglect to children in difficult circumstances. Pregnancy-related issues: safety, abortion and post-abortion care, teen pregnancy, and more. Strategies for planning, developing, and maintaining maternal and child health systems in developing countries. The status of global initiatives, such as Integrated Management of Childhood Illnesses and the Millennium Development Goals. The status of evidence-based maternal and child health in the developing world.

With such a wealth of information on both practical and conceptual levels, "Maternal and Child Health: Global Challenges, Programs, and Policies" is as relevant to students and researchers in the field as it is to policy makers and those working for global health and development organizations. It also makes an excellent stand-alone text for courses in global health in general and global maternal and child health in particular.

From reader reviews:

Myrtle Anderson:

Information is provisions for people to get better life, information presently can get by anyone with everywhere. The information can be a information or any news even a huge concern. What people must be consider whenever those information which is within the former life are challenging to be find than now is taking seriously which one is acceptable to believe or which one the particular resource are convinced. If you receive the unstable resource then you get it as your main information it will have huge disadvantage for you. All those possibilities will not happen inside you if you take Maternal and Child Health: Global Challenges, Programs, and Policies as the daily resource information.

Frances Sitz:

Playing with family in a park, coming to see the marine world or hanging out with close friends is thing that usually you will have done when you have spare time, after that why you don't try matter that really opposite from that. 1 activity that make you not experiencing tired but still relaxing, trilling like on roller coaster you already been ride on and with addition of information. Even you love Maternal and Child Health: Global Challenges, Programs, and Policies, you could enjoy both. It is very good combination right, you still want to miss it? What kind of hang type is it? Oh seriously its mind hangout people. What? Still don't buy it, oh come on its called reading friends.

Donna Johnson:

Many people spending their time by playing outside having friends, fun activity along with family or just watching TV all day every day. You can have new activity to spend your whole day by studying a book. Ugh, do you consider reading a book can actually hard because you have to use the book everywhere? It fine you can have the e-book, bringing everywhere you want in your Touch screen phone. Like Maternal and Child Health: Global Challenges, Programs, and Policies which is finding the e-book version. So , try out this book? Let's observe.

Larry Pulido:

Is it you actually who having spare time and then spend it whole day by means of watching television programs or just lying on the bed? Do you need something new? This Maternal and Child Health: Global Challenges, Programs, and Policies can be the reply, oh how comes? A fresh book you know. You are and so out of date, spending your free time by reading in this brand-new era is common not a nerd activity. So what these textbooks have than the others?
