Using Computers in History

Sonja Cameron, S. Richardson

Using Computers in History Sonja Cameron, S. Richardson

Information and communications technology is now an essential tool for the historian and for anyone engaging in historical study. Today's 'history workstation' includes computers, modems, scanners, printers, digital cameras and a wide range of software applications to access the World Wide Web and to analyse historical sources. Sonja Cameron and Sarah Richardson provide a clear, jargon-free introduction which demystifies the computing skills needed for historical research.

This step-by-step guide covers all aspects of history and computing including:

- presentation: from word-processing an article which conforms to scholarly protocols to presenting a slide show
- history and the World Wide Web: hints and tips on accessing and evaluating the wide range of historical material available on the internet
- databases: a clear introduction which guides you through the process of creating your own database of historical sources
- spreadsheets: a lucid explanation of basic quantitative methods, data analysis, graphing and charting
- digitised text and images: help on analysing digitised text, creating images and web pages.

The text is supported throughout by worked examples using historical sources, comprehensive illustrations, a detailed glossary and signposts to further study where appropriate. *Using Computers in History* is an indispensable aid to all those studying and researching history. Students, family and local historians, and history enthusiasts will all find this book informative and easy-to-use.

From reader reviews:

Alex Estep:

Do you have favorite book? In case you have, what is your favorite's book? Book is very important thing for us to be aware of everything in the world. Each guide has different aim or goal; it means that e-book has different type. Some people feel enjoy to spend their time for you to read a book. They may be reading whatever they have because their hobby will be reading a book. Think about the person who don't like examining a book? Sometime, person feel need book when they found difficult problem or exercise. Well, probably you will need this Using Computers in History.

Lori Suda:

In this 21st centuries, people become competitive in each way. By being competitive currently, people have do something to make these survives, being in the middle of the actual crowded place and notice by surrounding. One thing that at times many people have underestimated that for a while is reading. Yep, by reading a guide your ability to survive enhance then having chance to remain than other is high. For you who want to start reading a book, we give you that Using Computers in History book as beginning and daily reading guide. Why, because this book is more than just a book.

Suzanne Ferris:

Are you kind of active person, only have 10 or maybe 15 minute in your day to upgrading your mind talent or thinking skill even analytical thinking? Then you have problem with the book in comparison with can satisfy your short space of time to read it because pretty much everything time you only find guide that need more time to be read. Using Computers in History can be your answer as it can be read by an individual who have those short spare time problems.

David Baker:

Is it you actually who having spare time in that case spend it whole day by simply watching television programs or just telling lies on the bed? Do you need something new? This Using Computers in History can be the response, oh how comes? A book you know. You are and so out of date, spending your time by reading in this brand new era is common not a geek activity. So what these publications have than the others?
