## **Databases in Telecommunications II: VLDB 2001 International Workshop, DBTel 2001 Rome, Italy, September 10, 2001 Proceedings (Lecture Notes in Computer Science)**

Just like the previous workshop at VLDB 1999 in Edinburgh, the purpose of this workshop is to promote telecom data management as one of the core research areas in database research and to establish a strong connection between the telecom and database research communities. As I wrote in the preface of those proceedings, data management in telecommuni- tions is an interesting area of research given the fact that both service management and service provisioning are very data intensive, and pose extreme requirements on data management technology. Given the feedback on the previous workshop we decided to keep the same program set-up for this workshop: an invited speaker, a collection of research papers, and a panel discussion. We received 18 good quality papers from which we selected 12 to construct a very interesting program. The program has been divided into four sections. The first section focuses on CDR data warehouse and data mining technology. Data warehousing and data mining around customer usage data remains an important area of interest for telecommunication operators. The growing competition, especially in the mobile market, means that operators have to put more effort into customer retention and satisfaction. The second section focuses on performance issues around databases in telecommunication. Since telecommunication databases are characterized by their extreme requirements, for example in terms of volumes of data to be processed or response times, high volume data management and embedded and real-time data management are key aspects of the telecommunication data management problems in today's operational environments.

**From reader reviews:**

**Lawrence Gibbs:**

What do you regarding book? It is not important with you? Or just adding material when you want something to explain what the one you have problem? How about your time? Or are you busy man or woman? If you don't have spare time to do others business, it is make you feel bored faster. And you have time? What did you do? Everyone has many questions above. They need to answer that question because just their can do in which. It said that about e-book. Book is familiar on every person. Yes, it is correct. Because start from on kindergarten until university need that Databases in Telecommunications II: VLDB 2001 International Workshop, DBTel 2001 Rome, Italy, September 10, 2001 Proceedings (Lecture Notes in Computer Science) to read.

**Elvia Ecklund:**

The reason? Because this Databases in Telecommunications II: VLDB 2001 International Workshop, DBTel 2001 Rome, Italy, September 10, 2001 Proceedings (Lecture Notes in Computer Science) is an unordinary book that the inside of the guide waiting for you to snap the idea but latter it will zap you with the secret that inside. Reading this book adjacent to it was fantastic author who write the book in such amazing way makes the content on the inside easier to understand, entertaining way but still convey the meaning totally. So , it is good for you because of not hesitating having this any longer or you going to regret it. This excellent book will give you a lot of rewards than the other book have such as help improving your ability and your critical thinking method. So , still want to delay having that book? If I have been you I will go to the e-book store hurriedly.

**Grant Rickard:**

Are you kind of active person, only have 10 as well as 15 minute in your moment to upgrading your mind proficiency or thinking skill actually analytical thinking? Then you have problem with the book than can satisfy your short space of time to read it because this all time you only find reserve that need more time to be learn. Databases in Telecommunications II: VLDB 2001 International Workshop, DBTel 2001 Rome, Italy, September 10, 2001 Proceedings (Lecture Notes in Computer Science) can be your answer given it can be read by you who have those short time problems.

**Joseph Robison:**

Many people spending their time period by playing outside using friends, fun activity with family or just watching TV all day long. You can have new activity to spend your whole day by reading through a book. Ugh, think reading a book can actually hard because you have to accept the book everywhere? It ok you can have the e-book, taking everywhere you want in your Mobile phone. Like Databases in Telecommunications II: VLDB 2001 International Workshop, DBTel 2001 Rome, Italy, September 10, 2001 Proceedings (Lecture

Notes in Computer Science) which is having the e-book version. So , why not try out this book? Let's observe.
