**Diving Beetles of the World: Systematics and Biology of the Dytiscidae** Kelly B. Miller, Johannes Bergsten

Among the hundreds of thousands of species of beetles, there is one family, containing some 4,300 species, that stands out as one of the most diverse and important groups of aquatic predatory insects. This is the Dytiscidae, whose species are commonly known as diving beetles. No comprehensive treatment of this group has been compiled in over 130 years, a period during which a great many changes in classification and a near quadrupling of known species has occurred.

In *Diving Beetles of the World*, Kelly B. Miller and Johannes Bergsten provide the only full treatments of all 188 Dytiscid genera ever assembled. Entomologists, systematists, limnologists, ecologists, and others with an interest in aquatic systems or insect diversity will find these extensively illustrated keys and taxon accounts immensely helpful. The keys make it possible to identify all taxa from subfamily to genera, and each key and taxon treatment is accompanied by both photographs and detailed pen-and-ink drawings of diagnostic features.

Every genus account covers body length, diagnostic characters, classification, species diversity, a review of known natural history, and world distribution. Each account is also accompanied by a range map and at least one high-resolution habitus image of a specimen. Diving beetles are fast becoming important models for aquatic ecology, world biogeography, population ecology, and animal sexual evolution and, with this book, the diversity of the group is finally accessible.

### **From reader reviews:**

#### **James Rose:**

What do you think about book? It is just for students because they're still students or that for all people in the world, the actual best subject for that? Merely you can be answered for that issue above. Every person has various personality and hobby for every other. Don't to be obligated someone or something that they don't would like do that. You must know how great and important the book Diving Beetles of the World: Systematics and Biology of the Dytiscidae. All type of book are you able to see on many sources. You can look for the internet solutions or other social media.

#### **Kerry Giles:**

Nowadays reading books become more than want or need but also turn into a life style. This reading habit give you lot of advantages. Advantages you got of course the knowledge your information inside the book this improve your knowledge and information. The knowledge you get based on what kind of guide you read, if you want have more knowledge just go with training books but if you want truly feel happy read one together with theme for entertaining including comic or novel. Typically the Diving Beetles of the World: Systematics and Biology of the Dytiscidae is kind of guide which is giving the reader unpredictable experience.

#### **Carl Johnson:**

Reading can called imagination hangout, why? Because when you find yourself reading a book especially book entitled Diving Beetles of the World: Systematics and Biology of the Dytiscidae your head will drift away trough every dimension, wandering in each and every aspect that maybe mysterious for but surely can be your mind friends. Imaging each word written in a e-book then become one web form conclusion and explanation that will maybe you never get ahead of. The Diving Beetles of the World: Systematics and Biology of the Dytiscidae giving you one more experience more than blown away your head but also giving you useful info for your better life with this era. So now let us present to you the relaxing pattern this is your body and mind are going to be pleased when you are finished looking at it, like winning an activity. Do you want to try this extraordinary wasting spare time activity?

#### **Kimberly Hogan:**

In this era which is the greater person or who has ability in doing something more are more valuable than other. Do you want to become one of it? It is just simple strategy to have that. What you have to do is just spending your time not much but quite enough to experience a look at some books. One of many books in the top collection in your reading list will be Diving Beetles of the World: Systematics and Biology of the Dytiscidae. This book that is qualified as The Hungry Slopes can get you closer in turning out to be precious person. By looking way up and review this book you can get many advantages.
