Automation and Quality Assurance in Haematology

Automation and Quality Assurance in Haematology

The aim of this book is to provide a descriptive and critical assessment of automated instruments in common use in modern haematology laboratories. Topics discussed include instruments used for blood cell counting and sizing, automated examination of peripheral blood films, haemostasis, radio-isotopes and blood transfusion. The important subjects of quality control and quality assessment are described. Other chapters are devoted to the principles and methods of instrument evaluation and to the use of computers in general haematology. This is designed to be a reference for haematologists, clinical pathologists, and medical laboratory technologists in training.
