Sustainable Development Possible with Creative System Engineering Walter Sobkiw

Our Science, Innovation, Technology, and Engineering are breaking down just when we need it to ramp up. Few realize that sustainable development has always been part of human development and that it was these elements and how effectively they worked which allowed for our life on earth. If we fall down in these areas our only alternatives are war, revolution, and genocide as famine and want grip a naturally increasing human population. This little book is a call back to the fundamentals of Science and Art to solve our most complex problems. Today, our organizations are not capable of the challenges that must be addressed in our rapidly approaching future. It raises some difficult questions and proposes a surprising solution from our recent past. This book is for everyone everywhere as we all engage in trying to build everything - from software to cities.
